

Vision

The University of Exeter Innovation Centre brings together knowledge-based organizations from the public and private sectors for the benefit of Exeter and its region, by creating:

- An innovative and vibrant community of diverse sectors and networks
- An environment for knowledge-based and high-tech ventures to flourish

The Innovation Centre and our stakeholders will achieve this through a range of cost-effective solutions (facilities and services, knowledge and expertise), in particular:

- Development of skills, technologies and businesses
- Provision of diagnostic, information, brokerage, and business acceleration services
- Enabling collaborations, supply chains and knowledge transfer
- Innovation Exeter, an initiative linking the Innovation Centre to other centres and the new Exeter
- Science Park

The Centre is the flagship of the Innovation Exeter initiative, which aims to:

- Facilitate the application, transfer and exploitation of knowledge, technology and expertise
- Promote innovation in Exeter and its region
- Nurture sustainable technology ventures
- Generate employment and wealth
- Provide a Gateway to national and international markets and investment

This is not just a 'town and gown' initiative, it is a partnership between public and private sectors, in collaboration with our Stakeholders, networks and clients.
